

ASSEMBLY INSTRUCTIONS FOR SPINNING FASTENERS

Stop Your Flag from Tangling!

No Tools Required!

Fasteners slip over pole and hand-tighten; swivel clips fit any flag with grommets.

Instructions:

- Remove set screw from one fastener and slide fastener up from bottom of pole to just below the ornament. The spinning snap hook should be hanging down towards the bottom of the pole when the pole is held upright.
- Replace the set screw and hand-tighten.
- Clip the snap hook to the top grommet of your flag.
- Remove set screw from the second fastener and slide fastener up from bottom of pole to a point where it is parallel to the lower grommet of your flag. This second fastener should be slid onto the pole the opposite way from the first fastener so that the spinning snap hook is on the inside facing the first spinning snap hook.
- Replace the set screw and hand-tighten.
- Clip the snap hook to the lower grommet of your flag.
- Adjust the fasteners so that there is no slack in the heading of the flag but do not make the heading too taut or else the flag will not spin.
